

# Glazing dimensions for Eastleigh kits

## 3. London Underground Q stock

Below are the dimensions in millimetres for glazing panels for kits in the Eastleigh Model Rail London Underground Q stock, together with the quantities required for each type.

York Modelmaking offer a laser-cutting service - see <https://yorkmodelrail.com> Note that these come with a transparent protective surface that must be peeled off before assembly.

When ordering laser-cut panels you may wish to order a few spares to allow for mishaps.
