

# Glazing dimensions for Eastleigh kits

## 2. Isle of Wight stock

Below are the dimensions in millimetres for glazing panels for kits in the Eastleigh Model Rail Isle of Wight range, together with the quantities required for each type.

York Modelmaking offer a laser-cutting service - see <https://yorkmodelrail.com> Note that these come with a transparent protective surface that must be peeled off before assembly.

When ordering laser-cut panels you may wish to order a few spares to allow for mishaps.
